CAREER OBJECTIVE

Cloud & DevOps Engineer with hands-on project experience across AWS, Azure, GCP, Terraform, Docker, Kubernetes, and CI/CD pipelines. Eager to apply a strong academic foundation and practical skills to build scalable cloud infrastructure, automate deployments, and contribute to a forward-thinking organization.

TECHNICAL SKILLS

Cloud (AWS – Primary): EC2, VPC, S3, IAM, CloudFront, ALB, Auto Scaling, Transit Gateway, WAF, GuardDuty, CloudWatch, RDS, Lambda, Route 53, EKS

Azure: Azure VMs, VNets, NSG, VMSS, Storage

GCP: GCP Compute Engine, VPC, Cloud SQL, IAM

IaC Tools: Terraform (Primary), OpenTofu, Ansible

CI/CD & GitOps: Jenkins, GitHub Actions, GitLab CI/CD, Argo CD (Auto-Sync, Self-Healing)

Containers & Orchestration: Docker, Docker Compose, Amazon ECR, Kubernetes (EKS/ECS) – Pods, Deployments, Services, HPA, Helm

Monitoring & Logging: Prometheus, Grafana, Node Exporter, Loki, Dynatrace (Familiar), Datadog (Familiar)

Scripting Python (AWS Lambda), Bash

Security: IAM Policies, SG, NACL, WAF, GuardDuty

Version Control System: Git, GitHub, GitLab

Operating System: Linux

PROJECTS

End-to-End Microservices Deployment on AWS | *Terraform, Kubernetes, CI/CD, GitOps, Monitoring*

- Provisioned scalable AWS infrastructure with reusable Terraform modules (VPC, EC2, RDS, EKS, SG, ALB, Auto Scaling), reducing manual errors and deployment time.
- Built GitHub Actions CI/CD pipelines to automate Docker builds and pushes to Amazon ECR for repeatable delivery.
- Containerized and deployed microservices on EKS with HPA for dynamic scaling; implemented Argo CD GitOps for auto-sync and self-healing.
- Integrated Prometheus, Grafana, Node Exporter, and Loki for full-stack observability; automated EBS snapshots and log management via Lambda, CloudWatch, and EventBridge.

Database Migration: EC2 (Self-Managed) to Amazon RDS | *AWS RDS, High Availability, Security*

- Executed end-to-end migration from self-managed EC2 MySQL to Amazon RDS with minimal downtime and zero data loss.
- Configured automated backups, Multi-AZ failover, and parameter groups; updated connection strings, SG/NACL rules, and validated data integrity via checksums and row-count verification.

Automated Infrastructure Monitoring with Ansible, Prometheus & Grafana | *Ansible, Prometheus, Grafana, Linux, EC2*

- Automated Node Exporter installation and systemd service management across EC2 fleets using Ansible playbooks.
- Configured Prometheus with EC2 service discovery and wrote PromQL queries for CPU, memory, disk I/O, and node availability; built Grafana dashboards for real-time health visualization.

INTERNSHIP & TRAINING

Multicloud DevOps Training — Naresh IT, 2025

- Intensive training covering AWS, Azure, GCP, Terraform, Kubernetes, Docker, CI/CD, and DevOps best practices with real-world, production-style lab environments.

CERTIFICATIONS

- NPTEL – Cloud Computing and IoT 4.0, Silver Grade (IIT — National Programme on Technology Enhanced Learning)
- Multicloud DevOps Training – Naresh IT (Course Completion Certificate)

EDUCATION

Master of Computer Applications (MCA) — GIFT Autonomous College, Bhubaneswar, Odisha | CGPA: 8.13/10 | 2023–2025

KEY STRENGTHS

- Strong problem-solving with hands-on cloud/DevOps project experience
- Quick learner, adapts fast to new tools
- Solid grasp of IaC, automation, and cloud-native best practice
- Collaborative team player focused on continuous learning
