

RITIK RANJAN PATI

Cloud & DevOps Engineer

ritikranjanpati@gmail.com | +91-9348520919 | [GitHub](#) | [LinkedIn](#)

PROFILE SUMMARY

Motivated Cloud & DevOps Engineer with hands-on experience in AWS, Azure, GCP, Terraform, CloudFormation, Docker, Kubernetes, and CI/CD automation. Skilled in GitOps workflows (Argo CD) Infrastructure as Code, multi-cloud architectures, and monitoring stacks (Prometheus, Grafana). Adept at building scalable, secure, and observable systems while scripting automation in Python and Bash. Committed to DevOps best practices — reliability, security, and operational efficiency.

TECHNICAL SKILLS

Cloud Platforms	AWS (Primary): EC2, VPC, S3, IAM, CloudFront, ALB, Auto Scaling, Transit Gateway, WAF, GuardDuty, CloudWatch, RDS, Lambda, Route 53, EKS, Glue Azure: VMs, VNets, NSG, VMSS, Storage, App Service GCP: Compute Engine, VPC, Cloud SQL, IAM, GKE
IaC Tools	Terraform (primary), OpenTofu
CI/CD Pipelines	Jenkins, GitHub Actions, GitLab CI/CD, AWS CodeBuild (familiar)
GitOps	Argo CD (auto-sync, self-healing), Helm Charts
Containers	Docker, Docker Compose, Dockerfile, Amazon ECR
Orchestration	Kubernetes (EKS, ECS): Pods, Deployments, Services, Scheduling, HPA, Helm
Monitoring & Logging	Prometheus, Grafana, Node Exporter, Loki, Dynatrace (familiar)
Scripting	Python (Lambda), Bash (operational scripts)
Linux Admin	service management, troubleshooting, cron jobs
Version Control	Git, GitHub, GitLab, Git
Security	AWS WAF, GuardDuty, IAM policies, NSG, NACL

EXPERIENCE

DevOps Intern Naresh I Technologies, Hyderabad	Feb 2026 – Present
- Designed and provisioned scalable AWS infrastructure using Terraform and reducing manual deployment errors and ensuring IaC best practices. - Developed reusable Terraform modules for VPC, EC2, RDS, EKS, Security Groups, Load Balancers, and Auto Scaling across multiple environments (dev, staging, production). - Built CI/CD pipelines with GitHub Actions and Jenkins to automate Docker image builds, testing, and deployment to Amazon ECR and EKS. - Containerized applications using Docker and deployed them on Kubernetes using YAML manifests, and GitOps-based deployments via Argo CD (auto-sync, self-healing). - Integrated Prometheus and Grafana for Kubernetes cluster monitoring, dashboarding, and alerting; configured Loki for centralized log aggregation. - Automated operational tasks — log management, EBS snapshot creation — using AWS Lambda, CloudWatch Events, and EventBridge. - Secured application traffic using AWS WAF; exposed services via Application Load Balancer and Route 53 with health-check policies.	

- Collaborated with infrastructure and security teams, translating technical DevOps solutions into business-aligned outcomes for stakeholders.

PROJECTS

Automated Infrastructure Monitoring — Ansible, Prometheus, Grafana

- Automated server configuration and patch management using Ansible playbooks across multiple environments.
- Deployed Prometheus for real-time metrics collection with custom alerting rules; built Grafana dashboards for centralized visibility and proactive incident response.
- Improved monitoring coverage and mean-time-to-detect (MTTD) across dev, staging, and production environments.

Multi-Environment Cloud Infrastructure Management — Terraform

- Architected a modular Terraform codebase with environment-specific workspaces for controlled, isolated deployments.
- Applied IaC best practices — DRY modules, remote state (S3 + DynamoDB locking), and policy-as-code — ensuring consistency and maintainability.
- Enabled secure promotion of infrastructure changes from development through staging to production.

Database Migration — EC2 Self-Managed to Amazon RDS

- Planned and executed a zero-downtime migration from a self-managed MySQL instance on EC2 to Amazon RDS with automated backups and Multi-AZ failover.
- Ensured data integrity through pre-migration validation and post-migration reconciliation checks.
- Improved database availability, scalability, and security posture using managed RDS capabilities.

EDUCATION

Master of Computer Applications (MCA) — GIFT Autonomous College, Bhubaneswar 2023 – 2025 | CGPA: 8.13

B.Sc. in Physics — F.M. University, Balasore 2020 – 2023 | CGPA: 8.00

Higher Secondary (12th) — Nilgiri High School, Balasore 2018 – 2020 | 66.5%

CERTIFICATIONS

- NPTEL Certification — Cloud Computing and IoT 4.0 (Silver Grade)
- Python Internship Certificate — OCAC, Bhubaneswar
