

RITIK RANJAN PATI

Cloud & DevOps Engineer

Hyderabad, India | +91-9348520919 | ritikranjanpati@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with hands-on experience designing and automating AWS infrastructure using Terraform, building CI/CD pipelines with GitHub Actions, and deploying containerized microservices on Kubernetes (Amazon EKS) with GitOps (Argo CD). Experienced in observability with Prometheus, Grafana, and Loki, and in serverless automation with AWS Lambda, EventBridge, and Python. Seeking a Cloud / DevOps Engineer role to build scalable, secure, and automated cloud platforms.

TECHNICAL SKILLS

Cloud (AWS): EC2, VPC, S3, IAM, ALB, Auto Scaling, EKS, ECR, RDS, Lambda, CloudFront, Route 53, Transit Gateway, WAF, GuardDuty, CloudWatch, EventBridge, SNS

Other Cloud Platforms: Azure (VMs, VNets, NSG, VMSS, Storage); GCP (Compute Engine, VPC, Cloud SQL, IAM)

IaC & Config Management: Terraform, OpenTofu, Ansible

CI/CD & GitOps: GitHub Actions, Jenkins, GitLab CI/CD, Argo CD

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Amazon EKS, Amazon ECS, Helm, Horizontal Pod Autoscaler (HPA)

Monitoring & Logging: Prometheus, Grafana, Loki, Node Exporter, PromQL, CloudWatch; familiar with Datadog and Dynatrace

Security: IAM Policies, Security Groups, NACL, AWS WAF, GuardDuty

Scripting & OS: Python, Bash, Linux

Version Control: Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

DevOps Intern | Naresh I Technologies | Feb 2026 – Present

- Provision AWS infrastructure with Terraform using reusable modules for VPC, EC2, RDS, EKS, Security Groups, ALB, and Auto Scaling, reducing manual errors and deployment time.
- Build CI/CD pipelines with GitHub Actions that automate Docker image builds and push to Amazon ECR for repeatable application delivery.
- Containerize microservices with Docker and deploy them to Amazon EKS using Kubernetes manifests; configure HPA for dynamic workload scaling.
- Implement GitOps with Argo CD (auto-sync and self-healing) to maintain desired cluster state and prevent configuration drift.
- Integrate Prometheus, Grafana, Node Exporter, and Loki to deliver full-stack observability: metrics, dashboards, and centralized log aggregation.
- Automate EBS snapshots and log management using AWS Lambda, CloudWatch, and EventBridge, reducing operational overhead.

PROJECTS

Database Migration: Self-Managed EC2 MySQL to Amazon RDS | AWS RDS, MySQL, Multi-AZ, Security Groups

- Planned and executed the migration of a self-managed MySQL database on EC2 to Amazon RDS with minimal downtime and zero data loss.
- Configured automated backups, Multi-AZ failover, and parameter groups to improve availability and reduce database administration effort.
- Updated application connection strings and Security Group rules to secure access from the application tier.
- Validated data integrity before and after migration using checksum and row-count verification scripts.

Automated Infrastructure Monitoring | Ansible, Prometheus, Grafana, Linux, EC2

- Automated Node Exporter installation and systemd service management across multiple EC2 instances using Ansible playbooks for consistent configuration.
- Configured Prometheus with EC2 service discovery to scrape metrics dynamically without manual target updates.
- Wrote PromQL queries to track CPU, memory, disk I/O, and node availability, and built Grafana dashboards for real-time fleet health.

Serverless Application Deployment with Terraform | Terraform, AWS Lambda, S3, SNS, MongoDB, Python

- Provisioned a serverless architecture end-to-end with Terraform: Lambda functions, S3 static frontend hosting, SNS topics, and IAM roles and permissions as version-controlled infrastructure.
- Built event-driven workflows in which Python Lambda functions process events, read and write MongoDB data, and publish notifications through SNS.

- Automated full provisioning and teardown of the stack for repeatable deployments across environments.

Additional Projects (github.com/Ritikpati) | Python, JavaScript, React

- Built GPS Location and Routing Map (Python), a Spotify UI clone (HTML, CSS, JavaScript), and React mini-projects.

EDUCATION

Master of Computer Applications (MCA)

GIFT Autonomous College, Bhubaneswar, Odisha

2023 – 2025 | CGPA: 8.13/10

CERTIFICATIONS

- Cloud Computing and IoT 4.0, Silver Grade | NPTEL (IIT)
